

December 2013 FALY'S FAMILY Ministry News Letter

School: 2003-2013 : 10 years of education.

We are proud of the school which we are running. It grows in number and maturity every year. This year there are 265 students with 25 teachers at LPMI (Lycee Prive Mpanefa Iraka= School With A Mission College). As we start to celebrate the 10th anniversary of the school, we remembered all the challenges we faced in the beginning. We praise God that we were able to overcome all of them. We organized different competition: Cooking competition, chess, fanorona (Traditional Malagasy game like chess), basket ball, soccer). We noticed that the teachers and students imagination & creativity increased as they did this competi-

The government starts to notice the ability we have at the school. As I went to vote for the National President last December, I was amazed to see the persons in charge of the election in the community. Who are they? They are the teachers and volunteers from our school. The leaders of the community and the government trust them. Managing President election is a big responsibility but they trust our people to make it happen safely. We do believe that in 10 years time most of our people will be in leadership position to bring positive transformation among the communities.

Loving Care Clinic:

The Clinic has a visitor for 3 months. Amandea Lazaro is a medical student at the University of Australia. She came to House Of The Nations to see God's works and crazy things. She wants to remove her limited perceptions. She is a big help as she helped Clara in health education and also teaches English at the school.

On 26th last December, we went together to Tamatave for 5 days to serve the YWAM Base there. We visited two small villages , taught health education and treated 19 patients. One of them was a boy of 17y.o who was cut

Entrepreneurship:

We have tried few different activities to help the surrounding people to get some income. The successful one is planting strawberry. I started with 4 seedlings and now there are more than 100 families who get regular income through planting and selling them. We are still working hard on bee farming. There is a kind of bird as predator that eats bees on the air. On 25th January we'll have a French couple to train us more about bee farming and hopefully we 'll get new experience.

We realize that our Citroen Xantia cannot handle the bad road, especially when during this rainy season. So we decided to sell it and continue to trust the Lord for Toyota 4 X 4. Please, remember us in your prayers because living at the Base in Ambohitriniana-driana without a car is big challenge.

Dear friends,

*Now That We Have Achieved This Year.
We Hope That We Shall Always Be Successful by the Grace of God*

We really appreciate your efforts and love to support us in different aspects. We hope that you'll do same in future also..

Faly, Clara, Mamy, Liana, Mitia.
